ABOUT ME

Motivated and results-oriented Web Application Developer with strong expertise in backend development and full-stack technologies including Java, Laravel, Vue.js, PHP, React.js and MySQL. Proven ability to build scalable, secure and high-performance web applications with a solid foundation in object-oriented design and real-world project experience.

EXPERIENCE

Feb 2025 - Present
Web Application Developer

Trisan Ventures Private Limited
- Developing scalable web application using Laravel and Vue.js.
- Collaborate with UI/UX designers and backend teams to build responsive, secure, and modular applications.
- Responsible for feature enhancements, API development and improve application performance.

Jul 2024 - Feb 2025
Web Application Developer

Elshaddai IT Solutions and Development
- Developed and maintained full-stack application using PHP, React.js and MYSQL.
- Worked on diverse modules including authentication, dashboard analytics and dynamic data handling.
- Involved in project planning, database design and integration of RESTful APIs.

PROJECTS

Ev Project (Malaysia)
- Engineered a full-featured admin panel for EV management, covering user access control, charging station configuration, vehicle tracking, logs, and dynamic dashboards.
- Delivered both frontend (Vue.js) and backend (Laravel) modules, ensuring seamless workflows, secure API communication, and optimized performance.

Bizly - Client Shop portal
- Built and optimized an end-to-end admin panel enabling clients to manage products, menus, income - expense tracking, purchase entries, and account operations.
- Enhanced performance and user experience through modular Laravel backend development and modern Vue.js frontend components.

Invaa - Income Tracking Application
- Focused on optimizing an already-built system by refining workflows, fixing calculation discrepancies, and stabilizing core modules.
- Added new functionality allowing customers to design and download customized PDFs.
- Ensured compliance with income department logic and improved overall accuracy and performance across the platform.

ARMS (Asset Rental Management System)
- Improved the system's performance by optimizing the rental calculation logic, reducing processing time and enhancing accuracy.
- Refactored and optimized the report download modules (PDF/Excel), resulting in faster generation and reduced server load.
- Strengthened backend code quality for better maintainability and long-term scalability.

Sporty E-Commerce Platform

- Built a lightweight e-commerce website enabling users to order sports products and track purchases.
- Created an admin panel for managing orders, products, and inventory.
- Added advanced filters for product search and implemented automated email notifications for order confirmations.

Hospital Management System

- Built an end-to-end hospital management platform covering patient registration, appointment scheduling, billing automation, pharmacy/inventory tracking, and report generation.
- Improved operational efficiency by automating manual processes, ensuring accurate data handling, and enabling better coordination across hospital departments.

ChatVerse – Social Platform

- Built a social chat application similar to Instagram, featuring real-time messaging, user profiles, media sharing, online/offline indicators, and chat history management.
- Focused on delivering an intuitive UI and optimized backend for fast message delivery and smooth communication across devices.

EDUCATION

B.E Mech
Jun 2020 - Apr 2024

Sethu Institute of Technology

- Mechanical Engineering graduate with 81% academic record.
- Problem-solving skills and adaptability applied to diverse projects.
- CGPA - 8.10

SKILLS

- C , C++
- Java
- HTML
- CSS
- Javascript
- React.js
- Vue.js
- Node.js
- PHP
- Laravel
- MySQL
- MongoDB
